LED LIGHTING PRODUCT GUIDE

CREE LIGHTING
LED lighting replacements are general recommendations only. They can vary dependent upon application and optical performance requirements. Consult factory for specific product recommendation based on application.
LED DYNAMIC LIGHTING EXPERIENCE
Indoor LED DYNAMIC SKYLIGHT

• Independently controlled, separate sun and sky panels create unique east to west sun feature
• Recreates the dynamic experience of being under the natural sky
• Valuable sensory connection to the outdoors for people without access to windows
• Enhances architectural designs with visual impact and dramatic scene setting
• Supports wellness, productivity and the natural rhythms of the day
• Fully-illuminated panels provide omnidirectional light distribution similar to actual daylight
• Advanced lighting control and color changing capabilities while interacting with and connecting to other fixtures in the space to create an overall scene that fits the needs of the space
• An intuitive, wall-mounted touchscreen with a clean graphic interface gives fingertip control over multiple Cadiant™ luminaires
• Dawn, Morning, Midday, Afternoon, and Evening presets are standard; end users can easily create and save their own presets customizing light levels and color (CCT)
• Preloaded profiles are included – Hospital, Office, School & Follow-the-Sun – with the ability to change sky color, CCT & sun position
• Measures very high for Rf Skin, showing people in the best light and aiding in accurate diagnoses in healthcare spaces

CREE LIGHTING TECHNOLOGY
THE SMARTCAST INTELLIGENCE PLATFORM™

Wherever the lights, whatever the environment, the SmartCast Intelligence Platform™ enables advanced lighting control and limitless business applications with value far beyond lighting.

Simply Intuitive, Advanced Lighting Control—Everywhere.

Featuring an intuitive, simple design and user experience for operation, commissioning and data collection, the SmartCast Intelligence Platform™ brings scalable, intelligent lighting networks to every space, delivering energy savings of 70% or more and a highly personalized lighting experience.

An Open System That Supports SmartCast® and 3rd-Party Technologies.

This isn’t another proprietary “black-box” system that locks you into costly vendor charges for upgrades or inter-network connectivity. BACnet integration and a ReST-based application programming interface (API) open the door to virtually unlimited applications through seamless connectivity with enterprise networks, building management software and the Internet of Things.

A Secure Architecture.

Designed with security in mind from day one, the SmartCast Intelligence Platform™ employs industry-standard encryption to protect data streams, SmartCast® luminaires and other network endpoints. End users always retain control over access privileges, enabled applications and data streams shared with third parties. Software and security updates? They’re seamless.

Business Value Far Beyond Lighting.

Add SmartCast Advisor®, and the platform lets you turn data into dollars from day one with occupancy-based space optimization and situational awareness. For the future, the SmartCast Intelligence Platform™ is ready to pioneer data-driven applications that help businesses become more agile, productive and profitable.
So Easy, the Building of the Future Can Be the One You’re Already In.

**SIMPLE SET-UP AND COMMISSIONING**

OneButton™ Setup commissions hundreds of luminaires in a single step, providing smart lighting that meets existing and emerging buildings codes, wirelessly and over Power over Ethernet (PoE) — live in minutes, not weeks.

**ENVIRONMENTAL AWARENESS AND CONTROL**

Embedded sensors continually detect and share data on room occupancy and ambient light to fine-tune your environment and energy-saving strategies in real time.
Indoor CREE LIGHTING TECHNOLOGY

A PLATFORM FOR INTELLIGENT LIGHTING

SmartCast® Technology orchestrates the optimal environment for energy efficiency and productivity by adjusting brightness and color temperatures to tasks and personal preferences, and tracking improvements.

VALUE BEYOND LIGHTING

SmartCast® Technology creates secure lighting networks that connect seamlessly with other building management systems and with third-party IoT systems for even more value.

WAVEMAX® TECHNOLOGY
WaveMax® Technology is a breakthrough in the execution of waveguide technology that challenges industry-standard assumptions of how light is delivered. Featuring up to 90% optical efficiency and precise optical control, WaveMax® Technology enables customers to obtain unmatched visual comfort and improved color quality without sacrificing performance. This transformative technology redefines the limits of fixture design to optimize performance and provides more aesthetic options at an unmatched customer value.

COLORFAST DELTAGUARD® FINISH
Our exclusive Colorfast DeltaGuard® Finish protects our LED outdoor fixtures without compromise. Immersive conditioning across 18 stages delivers an e-coat epoxy primer with an ultra-durable powder topcoat, providing unmatched protection against corrosion, UV light, fading and weathering complete with a 10-year limited warranty.
CREE TRUEWHITE® TECHNOLOGY
Cree TrueWhite® Technology provides exceptional color quality to lighting applications. Featuring a broad spectral power distribution, Cree TrueWhite® Technology delivers 90+ CRI, high R9 values, and accurate and consistent color. The result is high performing, beautiful white light that can dramatically improve the visual appearance of both interior and exterior spaces — all while offering significant energy savings compared to traditional technologies.

NANOOPTIC® TECHNOLOGY
With patented NanoOptic® Technology available in multiple distributions, Cree Lighting’s outdoor LED fixtures provide precise optical control for exceptional application performance and energy savings. The NanoOptic® refractor system offers superior light control with more lumens delivered in the target area, improved uniformity ratios and controlled high-angle brightness.
