IMPORTANT SAFEGUARDS
When using electrical equipment, basic safety precautions should always be followed including the following:

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

1. DANGER - Risk of shock- Disconnect power before installation.
   DANGER – Risque de choc – Couper l'alimentation avant l'installation.

2. This luminaire must be installed in accordance with the NEC or your local electrical code. If you are not familiar with these codes and requirements, consult a qualified electrician.
   Ce produit doit être installé conformément à NEC ou votre code électrique local. Si vous n'êtes pas familier avec ces codes et ces exigences, veuillez contacter un électricien qualifié.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE

NOTES:
• Available luminaire lengths are 4' and 8'.
• Suitable for Damp Locations
• The LS Series is designed for multiple methods of installation, including: surface mount, T-bar ceiling grid attachment, and suspended by cable, chain or pendant. Mounting accessories are not included.
• Designed for use in 120-277V 60Hz protected circuit (fuse box, circuit breaker). Supply wire size as per NEC or governing code(s), 90C rated.
• Figures below show LS luminaire for illustration purposes only.

TO INSTALL:

Cree Accessories (ordered separately):
SUSPENDED MOUNT
• AC5-12/3-48-Q14B-JB- 48” Power Feed, #12/3 SJT Cord with Cable Support for J-Box
• AC5-18/5-48-Q14B-JB- 48” Power Feed, #18/5 SJT Cord with Cable Support for J-Box
• AC5-18/2-48-Q14B-JB- 48” Power Feed, #18/2 SJT Cord with Cable Support for J-Box
• AC5-48-Q14B-TB- 48” Cable Support for T-bar mount.
• B=LS-M - Optional Mounting Bracket

LUMINAIRE INSTALLATION

STEP 1:
Remove the lens/frame assembly from the housing by pulling up on the three pull tabs. After releasing the tabs, release latches along length of luminaire by pressing on designated areas of base and pull top lens frame assembly away from base. Pull tabs can be discarded once lens/frame assembly is removed. If the lens/frame needs to be removed in the future, once pull tabs have been discarded, then use a non-marring tool or by hand and release the rivet-catch on each end of the luminaire. After releasing rivet-catches, [See Figure 1, 2, and below]
NOTE: The lens and metal lens frame is a single assembly and does not come apart. DO NOT attempt to remove the lens from the metal lens frame.

• LS4: Press in the center and on each end (22” away from the center) of the base. Total of 3 designated areas to press
• LS8: Press in the center and every 23” away from the center, two per each end. Total of 5 designated areas to press
**STEP 2:**

**NOTE:** For dimension of mounting holes see last page Figure 6 and 7.
Mount the luminaire base to mounting surface using one of the following methods:

- **A - Surface Mounting**
  Secure luminaire base to mounting surface by inserting (2) customer supplied #8 anchor screws, toggle bolts or suitable fasteners, depending on structural conditions, into key hole slots on the top side of the luminaire base. See Figure 3.

- **B - Pendant Mounting**
  Attach luminaire base to (2) customer supplied 1/2” diameter pendant using the pendant holes on the top side of the luminaire base shown in Figure 3.

- **C - T-Bar Clip Mounting**
  Attach (2) customer supplied T-Bar clips to the designated opening on the luminaire as shown in Figure 3.

- **D - Aircraft Cable Mounting**
  Attach (2) customer supplied aircraft cable to the designated opening on the top side of the luminaire base as shown in Figure 3.

- **E - Wiring Knockouts**

**STEP 3:**

For single luminaire installation proceed to the next Step.
For multiple luminaire installation, insert customer supplied chase nipple and lock nuts into the knockout on the end cap located on each end of the luminaire. See Figure 5.

**STEP 4:**

Bring customer supply wires into luminaire through the wiring knockouts on the backside (E) or on the end caps and make electrical connections per “ELECTRICAL CONNECTION” section. See Figure 3.

**NOTE:** When connecting multiple luminaires together bring leads from adjoining luminaire into first luminaire through the end cap wiring knockouts and make wiring connections per electrical code. See Figure 4.

**NOTE:** If dimming is an option make electrical connection for dimming in the dimming compartment. See Figure 4.

**STEP 5:**

Reattach lens and metal lens frame assembly to luminaire base by connecting the plug together shown in Figure 2 and carefully push and metal lens frame assembly up into the base until it snaps in place.
ELECTRICAL CONNECTIONS

STEP 1:
Make the following Electrical Connections:

For 120-277V applications make the following Electrical Connections:

a. Connect the black luminaire lead to the line supply lead
b. Connect the white luminaire lead to the neutral supply lead
c. Connect the green or green/yellow ground lead to the supply ground lead
d. If Dimming is an option; connect the violet dimming positive lead to the supply dimming positive lead. If dimming is not being used, ensure to cap off the violet lead.
e. If Dimming is an option; connect the grey dimming negative lead to the supply dimming negative lead. If dimming is not being used, ensure to cap off the grey lead.
